## SUMMARY

---

With a Diploma in Software Engineering and Information Technologies, I have extensive exposure to different systems and technologies. In particular, I know Windows and Linux systems, DNS, Internet protocols, hosting, and also experience using programming languages and various frameworks for creating web applications. I have experience in developing and managing MySQL and SQL databases, as well as in deploying, maintain and administering applications on Linux and Windows.

At this moment, as a Web Developer, I am responsible for finding the most suitable web solutions and their implementations for various New Zealand clients, mostly with WordPress or custom PHP.
